• On the edge of the motherboard - Most jumpers are located on the side of the motherboard for easy accessibility, verify by looking at all visible edges of the motherboard.. However, note that in some cases these jumpers will be to change the processor and not the password.. • Under the keyboard or bottom of laptop - If you are working on a the location of the dipswitch (almost never a jumper) can be under the keyboard or on the bottom of the laptop in a compartment such as the memory compartment.. Removing the battery will reset the CMOS information/data including the password.. Kuttyweb A R Rahman Music - Instrumental Vol 1 KuttyNet Instrumental Songs Collection.
