Define Actions Jun 10, 2013 SAP XI Questions And Answers Skip to end of metadata.. Cross Component Business Process Management provides SAP NetWeaver Process Integration with functions for stateful message processing, that is, the status of an integration process is persisted on the Integration Server.. If you want to get an overview of the status of the individual SAP PI TutorialSAP PI Useful ResourcesSelected ReadingBusiness Process Management deals with cross component BPM.. This means that an integration process can, for example, wait infinitely until further messages are received or until a particular deadline is reached.. Exclude software component version SAP BASIS 6 40 means: all software component versions apart from SAP BASIS 6.

## software component dependency sap pi

software component dependency sap pi, software component dependency management, how to create software component dependency in sap pi, software component circular dependency [December 26th, 2017](#)

Moreover, it is possible to process messages further within an integration process.. 40 It is advisable to use the Exclude operator if you want to restrict the authorization for particular actions to just a set of objects that are likely to remain stable in the future, for example.. This includes SAP workflow in SAP backend and processing of message on Integration Server. [Rc Simulator Free Download Full Version](#)

The screenshot shows a SAP transaction interface with a process flow at the top and a data entry form below. The process flow consists of four steps: 1. Action Type, 2. Product, 3. Product Instance, and 4. Create Software Component and Version. Step 4 is highlighted in yellow. The data entry form is titled 'Add Software Component Version to Non-SAP Product' and contains the following fields:

Product Version:	NIKE SAP HRMS 1.0 of i
Product Instance:	NIKE SAP HRMS
Vendor:*	nike.com
Name:*	NIKE_SAP_HRMS
Version:*	1.0
Production State:	released

At the bottom of the form, there are three buttons: Back, Finish, and Cancel.
